Detailed Action

This action is in response to the application filed on 3/12/04.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I. – Claims 1-27. Group receiving educational institution indication of refund with a student and arranging to deliver refund to a student in accordance with determined delivery method.

Species II. – claim 28 Group refund from an educational institution to a plurality of students.

Species III. – claim 29-31 Group refund to an escrow then transferring holding account to associated member.

Species IV. – claim 32-35 Group receiving at a bank a payment and transferring payment into an escrow and from holding account to another associate account with the party.

The species are independent or distinct because they are mutually exclusive. Species III and IV deal with escrow accounts while the others are silent, additionally they have members and not students. Species II is distinct from Species I since it deals with a plurality of students.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
